

## Teaching as Inquiry Workbook

## Templates for Teaching Inquiry: Template overview

These worksheets / templates are designed to help structure your journey through a teaching as inquiry process. They are organised according to the stages of the spiral inquiry model, but they are not intended to be used in a linear order. Because the stages of inquiry overlap and are rarely distinct, and because your inquiry might progress in a non-linear and iterative way, jumping back and forth between stages, you may find different templates useful at different stages of the process. You can mix and match the templates or adapt them accordingly as per your requirements.

### ***Scanning phase: What is happening for students in your classroom?***

#### **TEMPLATE 1: Initial scan**

Explore what is happening for students in your classroom

#### **TEMPLATE 2: Observing students**

Discover students' learning processes through observation

#### **TEMPLATE 3: Tracking patterns**

Explore expectations, progress and achievement across the class

### ***Focusing phase: Where should you concentrate your energies in order to change the experiences and outcomes of your learners?***

#### **TEMPLATE 1: Data aggregation and analysis**

Create a data table to help you select focus of inquiry

#### **TEMPLATE 2: Selecting an area**

Analyse issues to aid selection of a focus for inquiry

#### **TEMPLATE 3: Narrowing the focus**

Make the focus of your inquiry very specific

## ***Developing a hunch phase: How are we contributing to this situation?***

### **TEMPLATE 1: Listing hunches**

Frame your theories and beliefs as hunches so you can subject them to scrutiny.

### **TEMPLATE 2: Developing hunches**

Develop multiple hunches

## ***Professional learning phase: How and where can we learn more about what to actions to take?***

### **TEMPLATE 1: Formulating professional learning goals**

Formulate learning goals for yourself

### **TEMPLATE 2: Resources and strategies**

Plan resources and strategies to meet your professional learning goal

## ***Taking action phase:***

## ***What will you do differently to make enough of a difference?***

### **TEMPLATE 1: Evaluating possibilities**

Critically evaluate strategies uncovered in your professional learning and prioritising actions to try

### **TEMPLATE 2a: Simple action plan**

Create a simple plan for taking action phase

### **TEMPLATE 2b Detailed action plan**

Create a detailed plan for taking action phase

### **TEMPLATE 3a: Monitoring progress**

Monitor progress towards your action plan

### **TEMPLATE 3b: Monitoring progress (team inquiry)**

Monitor progress towards team action plans

## ***Checking phase: Have we made enough of a difference?***

### **TEMPLATE 1: Collating data**

Collate evidence regarding impact of changes

### **TEMPLATE 2: Critical checks**

Critically examine evidence and counter evidence of the impact of your inquiry and plan adjustments

## SCANNING PHASE

## INITIAL SCAN

Explore what is happening for students in your classroom		LEARNING AREA:
<p>Where are students in their learning? How do they compare to desirable outcomes for their level in NZ curriculum? Include cognitive, aesthetic, physical, and socio-emotional learning.</p>	Desired achievement	<p>Current achievement Evidence(and counter-evidence)</p>
<p>What learning processes do students use? (examine what students say or demonstrate about their thinking during a task, and student products)</p>	Desired learning processes	<p>Observed learning processes Evidence(and counter-evidence)</p>
<p>What are student, family and community perspectives on this learning area?</p>	Desired attitudes	<p>Actual perspectives of students and families Evidence(and counter-evidence)</p>

Find someone to share this with: what do they notice in the data?

## SCANNING PHASE

## OBSERVING STUDENTS

Use this table to record and reflect upon your observations of students in relation to your inquiry:

**Student Name** \_\_\_\_\_

**Learning area/outcome** \_\_\_\_\_

Observe	What does this student say and do?
Infer	What might this student be thinking and feeling?
Is this student making the desired progress?	
What learning needs do you think this student has?	
What support might this student need? What might be interfering with or hindering their learning?	

## SCANNING PHASE

## TRACKING PATTERNS

Learning area \_\_\_\_\_

Group/class \_\_\_\_\_

Place your students on the chart according to their progress and achievement. Look for patterns. Where are the greatest concentrations of students? What surprises you? Are there some outliers? Which students have received specific teaching interventions? Which students might require changes in teaching approach?

Expected achievement		Below expected achievement	
Making adequate progress	Making adequate progress	Making adequate progress	Making inadequate progress

## FOCUSING PHASE

## DATA AGGREGATION AND ANALYSIS

Use this table to reflect on what you have uncovered during the scanning and focusing phases of your inquiry:

Emerging patterns, categories, trends		Why do these matter? What further evidence do you need?			
Data complete?	Data source				
Concealing something? Consistent and comparable with other data?	Do you have rich and multiple sources?				
What have you found out?					

## FOCUSING PHASE

## SELECTING AN AREA

Use this table to compare identified issues and decide which will become your area of focus. Rate each potential area of focus out of 10 according to the criteria listed.

Potential area of focus / potential issue	Level of need or importance	My capacity to influence and make changes	My strengths related to change in this area	Challenges foreseen	My level of interest in this area	Possibility of collaboration with others	Ease of assessing progress and change	What further information do I require?

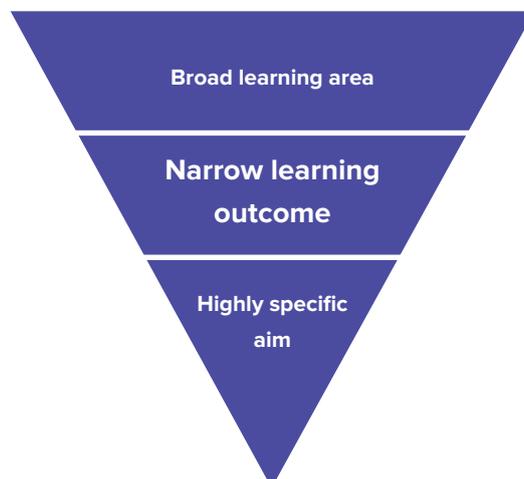

Area(s) for selection:  
(1 or 2 small and specific areas)

## FOCUSING PHASE

## NARROWING THE FOCUS

Try to narrow the focus of your inquiry and make it very specific:

What is the general area of improvement? i.e. mathematical problem-solving
What do you want students to know, understand and do? i.e. Students will develop the confidence and knowledge of a range of strategies to persevere with, and enjoy, mathematical word problems.
What will this look like? How will you know you have made a difference? i.e. Students will self-select more challenging problems and persist in solving them. Students will talk about and share strategies with excitement.
Which students? How will you identify them?

## DEVELOPING HUNCHES PHASE

## MULTIPLE HUNCHES

Brainstorm as many potential reasons as you can for the issue you have observed / identified:

Issue:	
Potential reasons for the issue	Why? What makes you think that?
1.	
2.	
3.	
4.	
5.	
What do you need to do to investigate these hypotheses?	

## PROFESSIONAL LEARNING PHASE FORMULATING LEARNING GOALS

Use this table to work out your professional learning goals for this inquiry:

Intended outcomes for this inquiry
Knowledge, skills and dispositions required by <i>students</i>
Actions required by <i>me</i> to support students learning of above. What knowledge, skills and dispositions do I require to perform these actions?
<b>My SMART goal</b>
What <b>s</b> pecifically do I want to achieve in my professional learning?
What <b>m</b> easure of success am I aiming for?
Is my goal <b>a</b> ttainable?
What <b>r</b> esults do I expect?
What is my <b>t</b> imeframe? How will I sustain learning over time?
Write your <b>SMART</b> goal for your professional learning here:

Remember to focus on outcomes and processes rather than activities!

## PROFESSIONAL LEARNING PHASE

## RESOURCES & STRATEGIES

Plan the best strategies and use of resources:

My SMART goal for professional learning:		
What do you already know that might be useful?		
Who can you link with for support?		
What resources might you need to inform your thinking?		
How will you learn? What strategies will you employ for this learning?  i.e. creating a study group with others, participating in an online community, writing reflections...		When and how often?
		When and how often?
		When and how often?

Action steps
1.
2.
3.
4.
5.

## TAKING ACTION PHASE

## EVALUATING POSSIBILITIES

List and compare possible teaching strategies here:

Intended outcome:	Possible teaching strategies	(circle one)	How?	When?	Where?
		could do / must do*			
		could do / must do*			
		could do / must do*			
		could do / must do*			
<p><b>THINK CRITICALLY:</b> Do these strategies fit with your context? Do you need to adapt this knowledge for your context? Is the underpinning theory of the strategy congruent with your context and aims?</p> <p><b>*Could Do's</b> are the teaching strategies that <b>COULD</b> be used in order for learners to make additional accelerated progress. <b>Must Do's</b> are the teaching strategies that <b>MUST</b> be used if students are to make progress in this learning outcome area.</p>					

## TAKING ACTION

## SIMPLE ACTION PLAN

Plan changes to your teaching to trial in relation to this inquiry:

Teaching strategy or approach	Expected impact		Assumptions	How impact will be evaluated
	on student learning behaviours	on student learning progress		

## TAKING ACTION PHASE

## DETAILED ACTION PLAN

Use this more detailed chart to record iterative cycles of planning throughout the inquiry:

		PLANNING						FINDINGS					
Issue	Desired practice	Cycle	Planned actions	Intended link to outcomes <i>What assumptions underpin your plan for action?</i>	Timeframe	Resources	Monitoring / assessment <i>Will this data be sufficient to determine whether your actions are resulting in improvements?</i>	Actual outcomes <i>What is going on for students as a result of your actions?</i>	Reflections / learning <i>What have you learnt about practice? What modifications are necessary?</i>				
		1											
		<b>Modifications</b>											
		2											
		3											
		4											
		<p>Remember to focus on outcomes. What student outcomes and what goals for your teaching practice do you aim for?</p>											

## TAKING ACTION PHASE

## MONITORING PROGRESS

Keep a record of your progress through the planned actions of your inquiry:

Planned actions	Not started	In progress	Completed

## TAKING ACTION PHASE

## MONITORING PROGRESS (TEAMS)

Keep a record of your progress through the planned actions of your inquiry:

Name	DONE <i>What have we done since our last meeting?</i>	STUCK <i>Where are we getting stuck / facing challenges?</i>	TWEAK <i>What adjustments do we need to make?</i>	NEXT <i>What are we going to focus on next?</i>				

## CHECKING PHASE

## COLLATING DATA

Use this table to collate the data relevant to your inquiry:

BASELINE DATA	ONGOING EVALUATION, ASSESSMENT AND NOTES	END OF INQUIRY PERIOD DATA

## CHECKING PHASE

## CRITICAL CHECKS

Use this table to collate and critically interrogate your data for this inquiry:

Aim / intended outcomes for students	Evidence source	Evidence <i>What evidence shows your actions are effective? Can you find evidence which shows your actions are not working?</i>	Critical checks <i>What critical questions do you need to ask of these findings? What are student and family perspectives on these findings?</i>	Adjustments needed / plans for action
